PERSONAL PROJECTS

Chat List ↗
- It is a WhatsApp chat list that uses **LRU Cache** Data Structure. When any new message is generated, the most recent message comes at the top of the chat list. We can generate random messages or delete their message from the chat list. I have created it using HTML, CSS, and **JavaScript**.

Pro to Type ↗
- It is a **Web Application** that tests your typing speed, and you can check your WPM and CPM typing scores in a flash! I have created it by using HTML, CSS, and **Javascript**.

What ToDo ↗
- It is a to-do list using **JavaScript** in which we can add to-do items, delete them and mark them as complete. All your to-do items are stored in the **local storage** of your browser.

Roll the Dice ↗
- I have created a rolling dice game using HTML, CSS, JavaScript. Its a two player game. The player first reaches to score 100 will be the winner of the game.
